Boards and Commission Action Recommended by the Water and Wastewater Commission

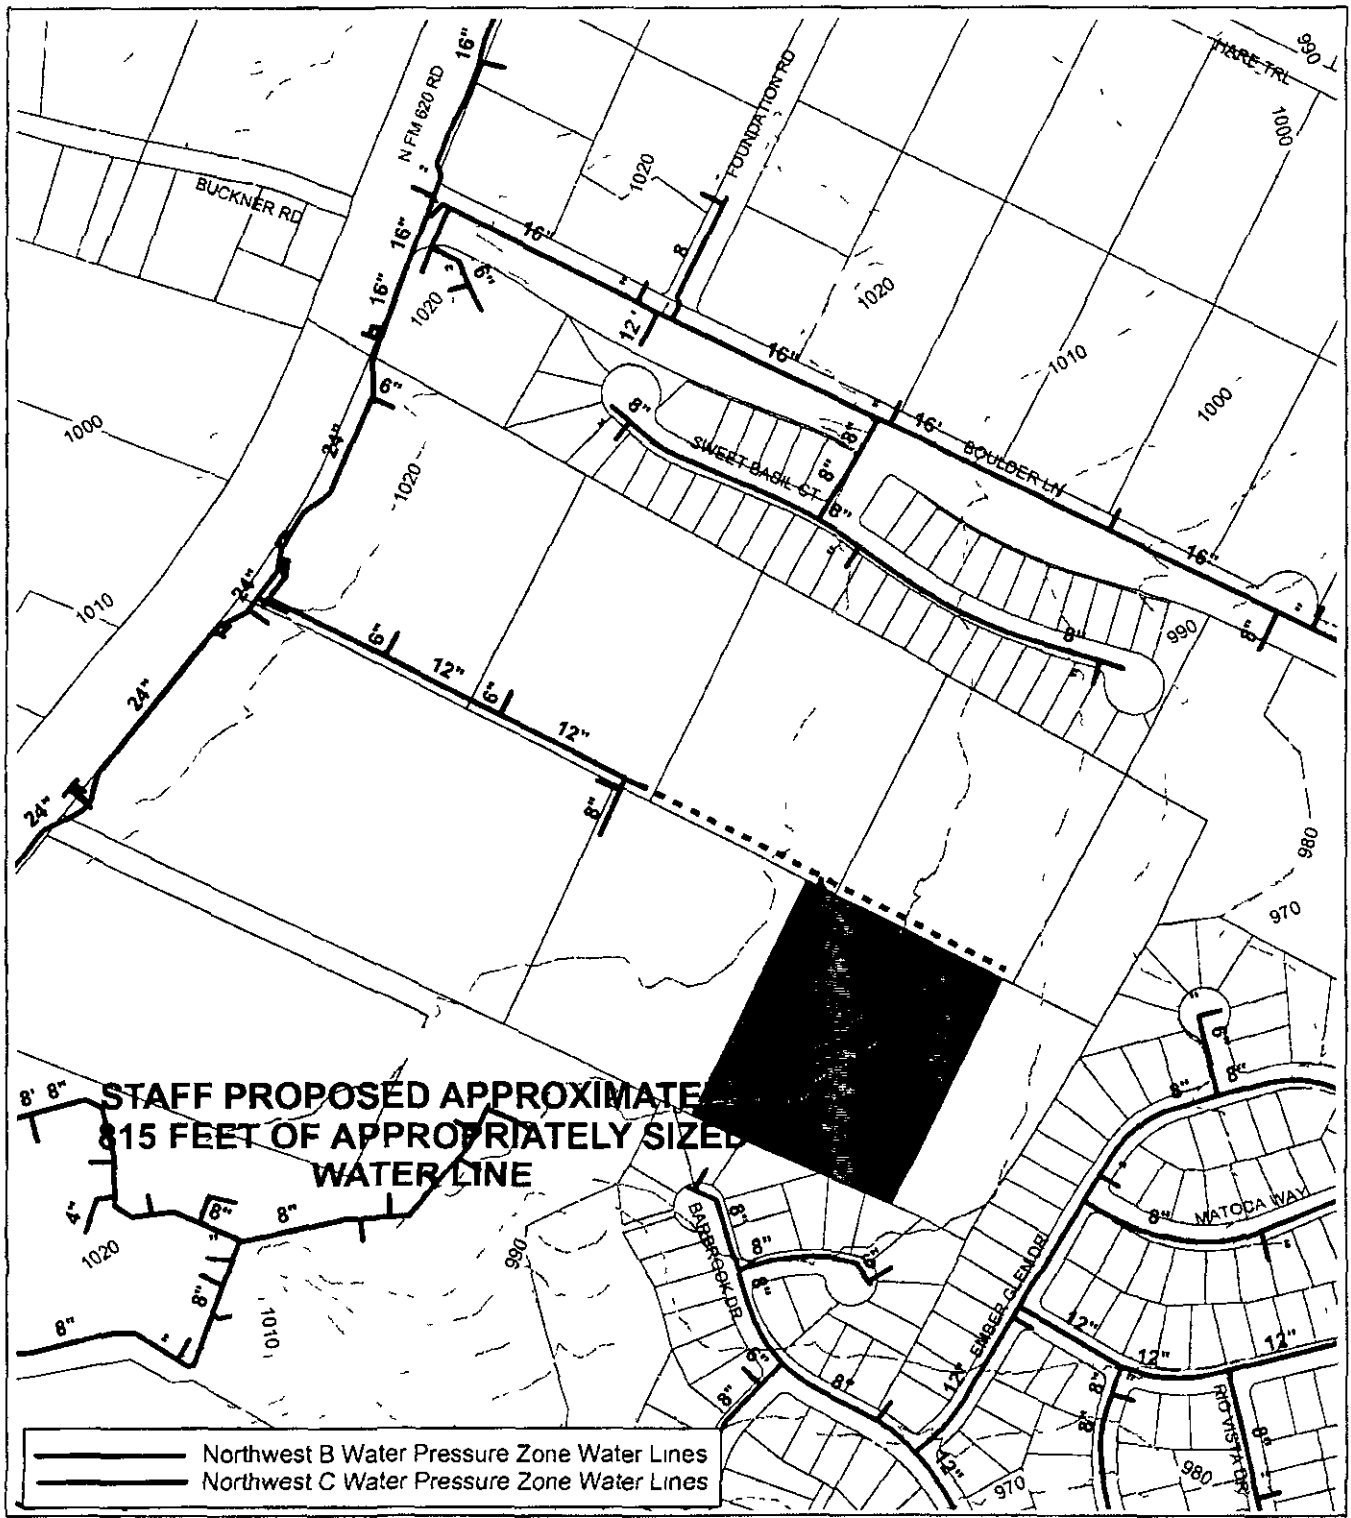

Enrique Vara, the homeowner of an existing single-family home has submitted Service Extension Request No 2557 requesting that the City provide water utility service to the existing single-family home. The subject tract consists of approximately 5 acres of land located outside the full-purpose city limits at 10303 North F M 620. This tract is located within the Council approved Impact Fee Boundary, Utility Service Area, and also within the Drinking Water Protection Zone and Bull Creek Watershed. The homeowner is experiencing water shortage with their existing well.

The request for service does not include City cost participation or reimbursement and based on the Utility's capacity analysis, adequate system capacity exists to meet the projected demands of the property to be served. The estimated peak hour flow is projected at 2 gallons per minute (gpm). This request is being brought to the City Council because of Ordinance 000406-87 that requires City Council approval for all Service Extension Requests in the Drinking Water Protection Zone and in an area annexed for limited purposes or in the extraterritorial jurisdiction. Applicant will construct approximately 800 feet of appropriately sized water line, not to exceed 8-inches, from the existing 12-inch water line west of the subject tract, east to the eastern property line of the subject tract. The proposed water improvements must be placed within an appropriately sized water line easement dedicated to the City of Austin.

The proposed water improvements will conform to all City of Austin Code requirements. The applicant will construct all required improvements at their cost and after approval of construction, the applicant will dedicate the facilities to the City for ownership, operation and maintenance. The applicant has submitted a written request to be annexed by the City. The existing home has a private onsite wastewater system and will continue to be used.

The Watershed Protection and Development Review Department, Transportation, Planning and Sustainability Department and other applicable City Departments have reviewed the subject Service
